Re: Referral Letter for Architecture Metals

To Whom It May Concern:

Please consider this letter a document of recommendation for Architecture Metals Ltd. Co. We have had the opportunity to work with Architecture Metals on an important project for Baylor University Medical Center.

Architecture Metals had the experience, products and ability necessary to successfully provide flood protection to protect our basement in case of rising water. We were very impressed with their expertise, ability to expedite the urgent order, and the professional manner in which they handled our project.

We highly recommend Architecture Metals in the areas of engineering design, project planning, architectural metal installation and construction management.

Best Regards,

Clem Myers
Project Manager
